# Google Workspace   Google Voice

Connect and save time from any device, anywhere

Google Voice uses powerful AI to ensure your employees stay connected to each other and their customers. With best-in-class security, a reliable calling infrastructure, and an intuitive admin and user experience, Google Voice lets you spend less time managing technology and more time moving your business forward.

Flexible: works where and how you do

- Single phone line works seamlessly across desktop, mobile, and desk phones
- Do not disturb mode promotes periods of extra focus
- Intuitive admin console lets you customize ring groups and port numbers, and add new users at scale

Helpful: saves time with Google AI

- Auto Attendants route callers to the right place and include multi-language text-to-speech
- AI-driven spam detection eliminates unwanted callers
- Voicemail transcription helps you get to messages faster

Trusted: telephony veteran

- Voice's trusted security and infrastructure is available in 14 countries and growing
- Google Voice helps prevent dropped calls by choosing the most reliable connection
- Intuitive administration and end user experience built for ease of use

Integrated with Google Workspace

- Make and receive calls directly from Gmail
- Call into Google Meet meetings in HD at no cost
- Synchronize out of office and working hours from Calendar

An enterprise-grade solution with a secure, global infrastructure

Google Voice leverages the power of Google AI to deliver security, quality, and reliability at scale

- ✓ High performance and **reliability** with 99.9% uptime SLA
- ✓ Optimal call quality with automatic VOIP and PSTN routing
- ✓ Industry-leading **security** and **privacy**
