

promevo[™]

Your Trusted Guide for **Google Meet** Products and Services

Collaboration is essential to propelling an organization forward. Connect from anywhere with **Google Meet hardware and software supported by Promevo**. **Google Meet** bridges the gap between your business and those who matter most to solve problems and accomplish goals at greater efficiency. Using the highest level of security/compliance standards and leading AI technology, **Google Meet** and its devices empower communication.

As a trusted **Google** partner, **Promevo** will guide your organization as you learn how to use **Google's** tools to connect, collaborate, and celebrate from anywhere.

Meet Powered by AI Technology:

- ▼ Auto framing - Camera zooms in on meeting participants when they are speaking, automatically.
- ▼ **TrueVoice**[™] - Distributes studio-grade audio, noise cancellation to remove distracting sounds, and detection and amplification of human voices anywhere in the room.
- ▼ Hands-free "Hey **Google**" - Voice controls let you join and leave video meetings with your voice. Dial phone numbers and control other functions with a simple command.

Google Meet Features and Devices

Enhance Video Conferencing Experiences

Intelligently Designed Hardware

Google Series One Hardware

Reliable, easy-to-use **Google** Meet hardware for personal desktops and conference rooms. Choose screens and room kits to best fit your needs.

Diverse Partner Ecosystem

Choose from **Asus**, **Logitech**, and **Lenovo** video conferencing devices and peripherals designed for **Google Meet**. Optimize meeting rooms with compatible devices for an enhanced and meeting experience for attendees.

Join Meetings in One Click

Quickly access and join meetings with deep Workspace integrations. Simply tap the controller or device screen to join. Upload all room information so meeting details are available. Wireless presentation and screen sharing to collaborate with participants across the world.

Protect Your Connection with Leading Security

Proactive anti-hijacking measures keep meetings secure. All video and audio data is encrypted automatically. Organizations maintain ownership of their data, not **Google**. Protect meeting information with interlocking, multilayered security for hardware, firmware, OS and browser.

Encourage Team Engagement

Incorporate tools and features to encourage engagement and reduce the screen barrier. Team members can collaborate using features including:

- ▼ Raise Your Hand
- ▼ Cast Votes in Polls
- ▼ Post Questions during Q&As
- ▼ Chat Communication during Meeting

Enterprise Scale Capabilities

Take advantage of large-meeting capabilities with up to 250 participants without additional add-ons. Host events, all-hands meetings, training, and more for up to 100,000 livestream viewers in an organization. Once recorded, store livestreams on **Google Drive** for reviewing and sharing at a later date.

Connect Across Workspace Apps

Google Meet integrates with **Gmail**, **Chat**, **Calendar**, **Slides**, **Docs**, **Sheets**, and **Drive**. Increase productivity by spending less time finding and toggling between apps.

Let Promevo Guide You

From evaluation through purchasing, installation and training, **Promevo** is here to guide you through your **Google Meet** journey. Ready to get started?
