

## Do any of these statements resonate with you?

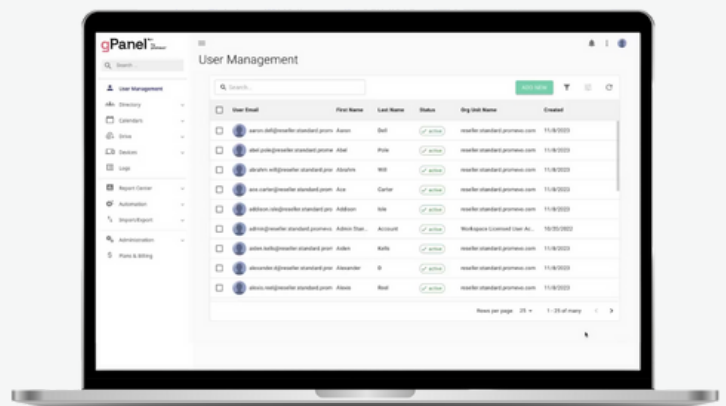

- You often find yourself manually updating important data in your Google Workspace environment, such as adding new user profiles, updating Gmail signatures, and performing onboarding/ decommissioning actions.
- You rely on several disparate tools or multiple platforms that don't communicate with one another to fulfill your administrative duties.
- You perform a lot of repetitive tasks that could potentially be automated to save time.
- You can't seem to make your Google Workspace reports as granular as you'd like.
- You find yourself getting frustrated with one-size-fits-all approaches to Workspace management.

**If you said yes**, then you need gPanel Enterprise, Promevo's comprehensive Workspace management and security solution.

## gPanel Enterprise

**gPanel Enterprise** goes above and beyond our Starter and Standard tiers, providing **advanced automation and integrations**, as well as data retention features.

APIs and a Rules Engine allow you to connect and extend automation across your Workspace apps. This tier also offers **data retention** beyond the standard 6 months available within the Google Admin console.
