gPanel® by promevo™
Standard vs. Enterprise

gPanel® is a powerful administrative tool created by Promevo, designed to simplify Google Workspace management and reporting. For years, gPanel has given businesses, educational institutions, and other organizations the tools they need to effectively manage their users and streamline workflows while safeguarding their most sensitive data.

Most of gPanel users subscribe to either the Standard or the Enterprise version of the platform. Each of these tiers offers a robust feature set at different price points to help you meet your organizational goals.

What Is gPanel Standard?

gPanel® Standard provides administrators with all the tools they need to manage users effectively in their domain while safeguarding sensitive data.

The platform goes above and beyond what is accessible in the Google Admin Console to enhance efficiency, security, and control over your data.

What Is gPanel Enterprise?

gPanel Enterprise takes the functionality of Google Admin Console and all other gPanel tiers to the next level.

The Enterprise-exclusive API allows admins to access system logs; automate onboarding, decommissioning, and standard policies; and seamlessly integrate with other applications.

Advanced reporting capabilities also allow you to generate reports spanning a user's entire lifecycle — well beyond the six-month report in Admin Console.

Advanced Reporting			✔
gPanel® API			✔

Both the gPanel Standard and Enterprise tiers offer a robust set of features for Google Workspace administrators, making Google Workspace management a breeze.

However, the advanced reporting and API integration of gPanel Enterprise provide an edge for businesses seeking to optimize their operations, improve security, and gain deeper insights into their Google Workspace usage.

Not sure which version of gPanel works best for your organization? Contact Promevo to schedule a demo and see both tiers in action.

Our team will conduct a comprehensive assessment of your current goals and requirements, so we understand your specific use case. Based on our assessment, we'll review the benefits, cost savings, and resources you can expect from the platform.
