Go to [Promevo.com/webinars](https://Promevo.com/webinars) for more info and to sign up for the series

summarize this sheet for me

Tip: Use Google Search results in responses.  
Try, "Give me 5 tips to improve SEO from the web."

## What is gPanel<sup>®</sup>?

gPanel<sup>®</sup> by Promevo is an exclusive Google Workspace management and reporting solution.

The intuitive centralized user management and security interface delivers peace of mind with a robust suite of features.

# Benefits for Our Clients

- Provides our customers time savings through Advanced User Administration and Admin Delegation, Automated Onboarding/Decommissioning Workflows
- Enhanced visibility through Unique Customizable Reporting
- Drives consistency in branding
- Operational efficiency gains through additional role delegation (Google Workspace Admins, Security Analysts, HR, Learning & Development, Marketing, First-line Managers)
- Superior Domain Security for their organization through granular security controls

## What Our Customers Are Saying

*Its presentation of data across Google Workspace is better than native tooling. There are various tasks where it is just faster to get answers via gPanel.*

*I can get in, and get out quickly and know exactly where all the controls are.*

*It makes managing individual user data easier. Especially info that requires you to log in as the user like vacation and autoresponders.*

# What's New?

- **New UI Transition in October**

We report on all of this on our release notes so make sure you're signed up for that!

[promevo.com/releasenotes](https://promevo.com/releasenotes)

There will be new features coming soon, so stay tuned for our future Office Hour webinars!

# Actions

Actions

Select the actions you would like to occur when the rule is triggered.

Action ▲

---

**External**

- Send Email
- Send Chat Message

**Policy**

- Run Policy

**User**

- Suspend User
- Change Password
- Reset Password
- Sign Out User

## Use Cases and Examples

### **Detect and Respond to Malicious Drive Activity**

A Rule is triggered when a user deletes a number of documents within a time frame. The Rule can respond by changing taking an action to temporarily limit the users access.

### **Fully configure a new user when they are added to Workspace**

A Rule is triggered when a user is added into Workspace. Based on their domain or OU a Policy can be executed that configures their Shares, Groups, and Settings.

### **Notify a watch Space when an excessive Admin event occurs**

A Rule is triggered when an Admin event occurs based within a certain OU or Domain and has occurred more than an allowed number of times within a time period. The Rule then notifies a Chat space with an alert and temporarily suspends the performing user.

### **Apply a Group Template when certain user create Groups**

A Rule is triggered when a Group is created based on certain OU or Domain. The Rule then applies a Group template to ensure the group is private and has the correct settings.

## Detect and respond to malicious drive activity

A Rule is triggered when a user deletes a number of documents within a time frame. The Rule can respond by temporarily limit the user's access.

Trigger - Documents deleted

Occurrence - within a timeframe

Source - Domain

Action - Suspend user, Send email

## Notify a watch Space when an excessive Admin event occurs

A Rule is triggered when an Admin event occurs based within a certain OU or Domain and has occurred more than an allowed number of times within a time period. The Rule then notifies a Chat space with an alert and temporarily suspends the performing user.

Trigger - Password change

Occurrence - 3 account deletions within 5 minutes

Source - One or multiple OUs

Action - Send chat message

## Fully configure a new user when they are added to Workspace

A Rule is triggered when a user is added into Workspace. Based on their OU or domain a Policy can be executed that configures their Shares, Groups, and Settings.

Trigger - User creation

Occurrence- Every time

Source - /Mark

Action - Run policy (Shares/Groups/Settings)

## Apply a Group Template when certain users create groups

A Rule is triggered when a Group is created based on certain OU or Domain. The Rule then applies a Group template to ensure the group is private and has the correct settings.

Trigger - Group creation

Occurrence - Every time

Source - Domain

Action - Run Policy
