What is gPanel[®]?

gPanel[®] by Promevo is an exclusive Google Workspace management and reporting solution.

The intuitive centralized user management and security interface delivers peace of mind with a robust suite of features.

Benefits for Our Clients

- Provides our customers time savings through Advanced User Administration and Admin Delegation, Automated Onboarding/Decommissioning Workflows
- Enhanced visibility through Unique Customizable Reporting
- Drives consistency in branding
- Operational efficiency gains through additional role delegation (Google Workspace Admins, Security Analysts, HR, Learning & Development, Marketing, First-line Managers)
- Superior Domain Security for their organization through granular security controls

What Our Customers Are Saying

Its presentation of data across Google Workspace is better than native tooling. There are various tasks where it is just faster to get answers via gPanel.

I can get in, and get out quickly and know exactly where all the controls are. ”

It makes managing individual user data easier. Especially info that requires you to log in as the user like vacation and autoresponders.

What's New?

- Rules Engine
- v2 Useability
 - Improvements to Calendars
 - Improvements to Device Management

We report on all of this on our release notes so make sure you're signed up for that!

There will be new features coming soon, so stay tuned for our future Office Hour webinars!

gPanel API / Rules Engine

- Overview of gPanel API and Rules Engine
- Key Features and Capabilities
- How to get Set Up and Knowledge Base
- Rules Engine
 - Triggers
 - Conditions
 - Actions
- Use Cases and Examples

Use Cases and Examples

Detect and Respond to Malicious Drive Activity

A Rule is triggered when a user deletes a number of documents within a time frame. The Rule can respond by changing taking an action to temporarily limit the users access.

Fully configure a new user when they are added to Workspace

A Rule is triggered when a user is added into Workspace. Based on their domain or OU a Policy can be executed that configures their Shares, Groups, and Settings.

Notify a watch Space when an excessive Admin event occurs

A Rule is triggered when an Admin event occurs based within a certain OU or Domain and has occurred more than an allowed number of times within a time period. The Rule then notifies a Chat space with an alert and temporarily suspends the performing user.

Apply a Group Template when certain user create Groups

A Rule is triggered when a Group is created based on certain OU or Domain. The Rule then applies a Group template to ensure the group is private and has the correct settings.
