Welcome!

Over the next 45 minutes, we will be taking you through

- How to implement zero-trust security, enforce secure authentication policies, and manage devices seamlessly from a centralized platform
- Learn how to automate identity and access management across all endpoints
- Reduce security risks with multi-factor authentication (MFA), and streamline IT operations
- Live Q&A session with our presenters

The need for MFA

Copyright © Promevo. Confidential. All Rights Reserved.

Article employees had to set 10 passwords for 10 different systems.

Now, passwords are linked between JumpCloud and Google Workspace, meaning fewer passwords and stronger security that enables — rather than inhibits — productivity.

“Every tool we looked at had a gap until we found JumpCloud. We spent a month testing, actively trying to break JumpCloud, but it was airtight. We knew we had found the right tool.”

Salar Sahraeian Senior Manager, Information Technology, at Article.

What’s the easiest next step?

- Back of the napkin transition
- What MFA you use in the day
- Have these conversations with partners
